JAZZ STANDARD RGB SYSTEM COMPONENTS

SYSTEM CONFIGURATION

SYSTEM FEATURES

RGB DMX controller US2ARC assigns addresses and implements color changing effects on clusters of RGB modules. An ID driver heads the cluster and drives up to 60 RGB modules. A data repeater is added to extend the data signal to another 60 RGB modules.

DMX controller US2ARC can assign addresses to 170 ID drivers. US2ARC is programmable and can store up to 32 programs. These programs can be combined into macro programs for viewing.

Remote key pad included.
