JAZZ ULTRA RGB SYSTEM COMPONENTS

SYSTEM CONFIGURATION

SYSTEM FEATURES

RGB controller US1621 can address and specify color changing effects for each US1620B RGB module. Each US1620B RGB modules has embedded ID.

RGB controller US1621 can address a maximum of 1024 RGB modules individually. To avoid voltage drop and current overloading the line, a new power supply run is recommended for every 100 RGB modules.

RGB controller US1621 comes with 16 pre-set programs. Program customization available upon request.

Remote key pad included.
